Beta Tester Packet — Oxford House Expense Tracker

This packet is for **beta** testers: use the app in real day-to-day scenarios, focus on **usability and experience** (clarity, speed, workflow), and keep reporting bugs when you find them. Full PDF how-to guides for the mobile app and web portals are linked below.

---

1. Your mission

- Use the app in **real day-to-day** scenarios (your actual rhythm of work, not only "test mode").
- Focus on **usability and experience** — clarity of labels, speed, and whether workflows make sense.
- **Continue reporting bugs** and friction when you find them.

---

2. Important: Keep your normal expense process

Do not use this app as your only expense workflow during beta.

You must continue to:

- Track expenses the same way you do today.
- Submit expenses to your supervisor through your **normal** process.

---

3. Get access (mobile and web)

iPhone (primary tester path)

1. **Accept the Apple Developer Program team invite** for **Oxford House, Inc.** You will get an email with the subject **"You're invited to join a development team."** Tap **Accept invitation** in that message (see the screenshot below).
2. **Notify Goose** after you have accepted. Goose will then send the **TestFlight** invitation to the correct **Apple ID / iCloud** email.
3. Install **TestFlight** from the App Store: Download TestFlight.
   Printed URL: `https://apps.apple.com/us/app/testflight/id899247664`
4. When you receive the **TestFlight** invitation email, **open it on your iPhone** and tap **View in TestFlight** (see the second screenshot below). Do not rely on desktop-only steps for this link.

5. If your iCloud or TestFlight email is **not** your work email, tell Goose so invites go to the right account.

Visual reference — Apple Developer team invite email

*Apple Developer — **You're invited to join a development team** for **Oxford House, Inc.** Accept this invitation first, then tell Goose.*

Visual reference — TestFlight invitation email (tap View in TestFlight)

*Open this email **on your phone** and tap **View in TestFlight**.*

Visual reference — iPhone (TestFlight in the App Store)

TestFlight in the App Store — open the listing from the link above or search for "TestFlight."

Visual reference — iPhone (TestFlight app install / update screen)

*TestFlight — **Oxford House Expense Tracker** with **Install** or **Update**. Your screen may show a different build number.*

Android

1. Join internal testing: [Join Android Internal Test](#).
   Printed URL:
   `https://play.google.com/apps/internaltest/4701544356101901260`
2. If your Google Play account email is **not** your work email, tell Goose.

Visual reference — Android (internal testing link)

What you may see after tapping the internal test link — browser page, Play Store, or "You're a tester" (exact layout can vary by device and Android version).

Visual reference — Android (Play Store — update available)

*Google Play — internal test listing when a **new build** is ready. Tap the blue **Update** button. You may see the package name and "(unreviewed)" plus a note that this is a test build — that is normal for internal testing.*

Getting the latest build (updates)

When we release a new test build, use the steps below so you are not stuck on an old version.

iPhone — TestFlight

1. Open the **TestFlight** app (purple icon).
2. Tap **Oxford House Expense Tracker** (or your app name in the list).
3. If a new build is available, tap **Update** (or open the app from TestFlight and tap **Install** / **Update** when prompted).
4. TestFlight may also **notify** you when a new build is ready — check **Settings** in TestFlight for notification preferences.

Android — Google Play (internal testing)

1. Open the **Google Play Store** app.
2. Go to **Manage apps & device** → **Updates** (or open **My apps** and find the app), or search for **Oxford House Expense Tracker** and open the store listing.
3. If the internal testing track has a newer **version**, tap **Update**.
4. If you do not see an update, pull the **Updates** screen to refresh, or open the internal test link again — sometimes the Play Store needs a moment to show the new build.

Web portals

Portal	Access (link + printed URL)
Staff	Staff Portal Login Printed URL: `https://oxford-mileage-tracker.vercel.app/login`
Supervisor	Supervisor Portal Login Printed URL: `https://oxford-mileage-tracker.vercel.app/login`

---

4. Login credentials

Use the credentials **provided by Goose** (not posted in this document).

Example format:

Field	Example
Email	`firstname.lastname@oxfordhouse.org`
Password	`Firstnamewelcome1`

---

5. User manuals (PDF)

These match the **PDF How-To** guides in the product; use them as the reference while testing.

Guide	Link
Mobile App	Mobile App How-To PDF
Staff Web Portal	Staff Portal How-To PDF
Supervisor Web Portal	Supervisor Portal How-To PDF

Support page (all how-to guides in one place): Oxford House Expense Tracker — Support

Printed URL: `https://oxford-mileage-tracker.vercel.app/support.html`

---

6. Submit feedback and bugs

Use this form for **every** issue, improvement idea, or concern (one submission per distinct topic, or split if one report is long):

Submit Tester Feedback Form

Printed URL: `https://forms.gle/vmUf6qzESDk5uTai8`

Quick link (same form): Expense Tracker — Feedback — `https://tinyurl.com/ExpenseTracker-Feedback` (also on the Support page).

Below is what each field is for—fill in every item that applies to your report.

Your name

Your full name so we can follow up with questions if needed.

Platform

Where you saw the issue or idea:

- **Mobile App** — iOS (TestFlight) or Android (internal testing).
- **Web Portal** — Staff or Supervisor (or note which portal if the form has a separate field).

If you are not sure, say what device you used (e.g. "iPhone 15, iOS 18").

Issue type

Pick the closest match:

Type	Use when
Bug	Something broken, wrong data, crash, or error message.
Enhancement	A concrete feature you want added or changed.
User Experience Improvement	Confusing, slow, or awkward—but not necessarily "broken."
Question / Concern	General question or worry about rollout, privacy, or process.

Description (short)

One or two sentences: what happened or what you noticed. **This is the headline** someone reads first.

Summary (more detail)

Expand here: what you were trying to do, what screen you were on, and any other context (time of day, after sync, etc.).

Steps to reproduce

Numbered steps so another person can try the same thing:

1. ...

2. ...
3. ...

If you cannot reproduce it, write **"Could not reproduce"** and describe what you did when it happened once.

What you expected vs what actually happened

- **Expected:** What you thought the app or portal should do.
- **Actual:** What it did instead (including exact error text if any).

Severity

How bad is it for real users?

Level	Meaning
Critical	Blocks work, data loss, crash, or security concern.
High	Major feature broken or wrong data with no easy workaround.
Medium	Problematic but usable with a workaround.
Low	Minor typo, cosmetic issue, or rare edge case.

Frequency

How often does it happen when you try the same flow?

- **Always** — Every time.
- **Often** — More than half the time.
- **Sometimes** — Occasionally.
- **Once** — Only saw it one time.

Attachments (screenshots or files)

Add screenshots, screen recordings, or exports when helpful. Include:

- The **full screen** or the **error message** in view.
- If the form allows, **one issue per report** so attachments stay clear.

Quick reference

Field	Short prompt
Platform	Mobile app vs web; device if helpful
Issue type	Bug, Enhancement, UX improvement, Question
Description	Short headline
Summary	Longer context
Steps to reproduce	Numbered steps or “N/A”
Expected vs actual	Both sides
Severity	Critical → Low
Frequency	Always → Once
Attachments	Screenshots / files

---

7. Beta testing focus checklist

Use this as a **quality** list during beta:

- **End-to-end workflows** feel intuitive and fast (not just single screens).
- **Labels, prompts, and error messages** are easy to understand.
- **Navigation** between mobile app and web features feels consistent.
- **Common weekly tasks** can be completed without confusion.
- Note any **friction** or “this could be easier” moments and report them.

Oxford House Expense Tracker — beta testing packet.
