

Oxford House Expense Tracker — Test Scenarios

For beta testers — use this checklist to exercise the mobile app and web portals from every angle. Record **Pass**, **Fail**, or **Blocked** for each scenario. For failures, note device, account role, steps, and screenshots.

Setup: See `BETA_TESTER_PACKET.pdf` for TestFlight access, login, and reporting bugs. Continue your **normal** expense process in parallel during beta.

Last updated: June 2026

Before you start

Test accounts needed

Ask your admin if you do not have access:

Role	What to test
Staff / employee	Mobile app + Staff Portal
Supervisor	Supervisor Portal + team approvals
Senior staff	Senior Staff Portal (review-only first pass)
Finance	Finance Portal (final approval)
Contracts	Contracts Portal (read-only)
Admin	Admin Portal (employees, HR sync, config)

Devices

- **iPhone** — primary mobile testing (TestFlight build)
- **Desktop browser** — web portals (Chrome or Safari recommended)

Bug report template

1. Scenario # from this document
2. Account role and name (if safe to share)
3. Device and browser version
4. Steps to reproduce
5. Expected vs actual result

6. Screenshot or screen recording
 7. Report month/year (if applicable)
-

1. Authentication and first-run (mobile)

#	Scenario	Steps	Expected result
1.1	Email login	Log in with valid staff credentials	Home screen; correct name shown
1.2	Bad password	Enter wrong password	Clear error; app does not crash
1.3	Google login	Sign in with Google (if enabled)	Session restores; correct profile
1.4	Stay logged in	Log in, force-quit app, reopen	Still logged in when stay-logged-in was used
1.5	Biometrics	Enable Face ID/Touch ID; log out and back in	Biometric login works
1.6	Onboarding	Fresh account or reset onboarding	Slides show once; then setup wizard
1.7	Setup wizard	Complete wizard	Base address, cost center, hours saved
1.8	Logout	Log out from Settings	Returns to login screen

2. Mobile — Home and navigation

#	Scenario	Steps	Expected result
2.1	Month selector	Change month on Home	Stats reflect selected month
2.2	Tile reorder	Edit mode → reorder → save	Order persists after restart
2.3	Sync / refresh	Pull to refresh or sync	Data updates; last sync time shown
2.4	Over The Air update	If prompted: Later vs Restart	Later dismisses; Restart reloads cleanly
2.5	Per Diem navigation	Open Per Diem, scroll and edit	Does not randomly return to Home
2.6	GPS overlay	Start GPS → go to Home → Return/Stop	Can return to GPS; trip completes

3. Mobile — GPS mileage

#	Scenario	Steps	Expected result
3.1	Start trip	Vehicle, cost center, purpose, start location	Tracking starts; distance accumulates
3.2	Full address	Start and end trip	Full street + city/state; confirm street number
3.3	End at base	End trip using base address	Trip saves without broken modal
3.4	My Flock location	Start/end using My Flock house	House selects; address returns correctly
3.5	Saved addresses	Pick saved address	Address fills correctly
3.6	Session restore	Start trip → force-quit → reopen	Returns to GPS; trip still active
3.7	Complete trip	End with end location	Mileage entry saved with correct miles

4. Mobile — Manual mileage

#	Scenario	Steps	Expected result
4.1	Add entry	Date, locations, miles, purpose, cost center	Saves and appears in list
4.2	Date-scoped odometer	Set odometer on Day A; open Day B	Day B does not use Day A odometer
4.3	Odometer hint	After travel day, open next travel day	Previous ending odometer shown as hint
4.4	Edit / delete	Edit then delete an entry	Syncs; removed from web
4.5	My Flock picker	Choose flock house	Location populates correctly

5. Mobile — Receipts

#	Scenario	Steps	Expected result
5.1	Camera capture	Add receipt via camera	Crop → save works
5.2	Gallery	Add from photo library	Same flow works
5.3	Receipt image read	Take a clear photo of a receipt	App fills in vendor, amount, and date from the photo; you can change them before saving
5.4	Low quality	Blurry or tiny image	Quality warning if score is low
5.5	View list	Open Receipts for month	All receipts listed correctly

6. Mobile — Daily hours and descriptions

#	Scenario	Steps	Expected result
6.1	Working hours	Enter hours by cost center	Syncs to web Timesheet
6.2	Description	Add daily description	Appears on web Daily Descriptions
6.3	Day off — PTO	Mark PTO day off → save	8 PTO hours on web; not Working Hours
6.4	Day off — Holiday	Mark Holiday day off	8 holiday hours on web
6.5	Day off — Sick	Mark Sick Day	Saves correctly
6.6	Clear day off	Uncheck day off	Hours/description clear appropriately
6.7	Stay after save	Save a day	Stays on day list (not kicked to Home)
6.8	PTO reminder	First PTO day in month	One-time partial-PTO reminder
6.9	Rapid saves	Edit several days quickly	No “Too many requests” errors
6.10	Stayed overnight	Check overnight flag	Affects per diem eligibility per rules

7. Mobile — Per diem

#	Scenario	Steps	Expected result
7.1	Eligibility	Day with 8+ hrs and 100+ mi	Day shows eligible
7.2	Claim amount	Enter per diem for eligible day	Respects daily cap and monthly limit
7.3	Tiered rules	Employee on tiered cost center	Amount follows distance tier
7.4	Receipt image required	Only if your cost center requires it (admin may turn this on for some testers): try to save per diem without a receipt photo	App blocks save until you add a receipt image; if your center does not require it, skip this test
7.5	Save all	Save month's per diem	Syncs to web; monthly total correct
7.6	Accidental back	Scroll on Per Diem screen	Does not accidentally navigate away

8. Mobile — My Flock

#	Scenario	Steps	Expected result
8.1	View flock	Open My Flock	Houses listed alphabetically
8.2	Add house	Search and add Oxford House	Appears in list; syncs to web
8.3	State default	Add with base address set	Search defaults to employee state
8.4	Remove house	Delete pinned house	Removed on mobile and web
8.5	GPS / mileage use	Pick flock house as location	Correct address in trip/entry

9. Mobile — Settings and sync

#	Scenario	Steps	Expected result
9.1	Theme	Toggle light/dark	Persists after restart
9.2	Vehicles	Add/edit vehicle	Available in mileage/GPS
9.3	Data sync	Manual sync from Data Sync screen	Success; queue clears
9.4	Notifications	Dismiss smart notification	Stays dismissed after refresh
9.5	Offline sync test	Make a small edit in the app (for example, change a daily description). Do not tap Sync yet. Turn on Airplane mode for about 10 seconds. Close the app completely (swipe it away from recent apps). Open the app again. Turn Airplane mode off . Go to Data Sync and tap Sync .	Your edit is still there after you sync — nothing was lost

10. Web — Staff Portal (employee)

Report building

#	Scenario	Steps	Expected result
10.1	Month navigation	Switch month/year	Correct report loads
10.2	Mobile sync	Sync mobile → refresh web	Mileage, receipts, hours, per diem match
10.3	Mileage tab	View/edit; reorder trips in a day	Order saves; totals correct
10.4	Daily Descriptions	Edit description	Saves; shows on Cost Center tab
10.5	Day off dropdown	Change Day off → PTO → Save	Stays PTO (does not revert)
10.6	Day off + mileage	Toggle Day off on day with mileage	Can check and uncheck
10.7	Timesheet categories	Enter PTO/G&A in bottom section	Stays in category rows, not Working Hours
10.8	Partial PTO	Partial PTO on web; refresh mobile	Same calendar day (no timezone shift)
10.9	Receipts	Upload, crop, view receipt	Image displays; saves correctly
10.10	Per Diem tab	Review eligible days	Matches mobile; tiered rules apply
10.11	Cover sheet	Signature + certification	Tab warning clears when complete
10.12	Save report	Save without submitting	Draft persists after refresh

Submit and weekly check-up

#	Scenario	Steps	Expected result
10.13	Submit report	Submit completed month	Status → pending (per routing)
10.14	Weekly check-up	Share weekly check-up	Reviewers notified; weekly cooldown works
10.15	Withdraw	Withdraw at first approval step	Returns to editable state per rules
10.16	Export PDF	Generate monthly PDF	Downloads; totals match screen

Revision flow (staff)

#	Scenario	Steps	Expected result
10.17	Receive revision	Supervisor requests revision	Flagged items highlighted
10.18	Fix and resubmit	Fix flagged items → resubmit	Re-enters approval workflow
10.19	Approved lock	After full approval	Report not editable

11. Web — Senior Staff Portal

#	Scenario	Steps	Expected result
11.1	Pending queue	Open Approvals	Shows <code>pending_senior_staff</code> reports
11.2	Approve	Approve a report	No signature ; advances to supervisor
11.3	Request revision	Flag specific items	Employee gets revision flags
11.4	Weekly check-up	Employee shared weekly check-up on draft	Only Accept check-up — no Approve/Revision
11.5	View report	Open employee report	Review mode works
11.6	Comment / remind	Add comment or reminder	Notifications sent

12. Web — Supervisor Portal

#	Scenario	Steps	Expected result
12.1	Pending queue	Open Approvals	Team reports pending supervisor
12.2	Approve	Certify + sign → approve	Moves to pending_finance
12.3	Request revision	Select items + notes	Employee sees revision flags
12.4	Weekly check-up	Open draft after weekly check-up	Accept check-up only; no monthly Approve
12.5	Team setup	Assign senior staff to report	Routing preview correct
12.6	Assign staff	Assign employees to supervisor	Shows state + cost center ; search works
12.7	Contract utilization	View utilization tab	Data loads
12.8	Delegate / remind	Delegate or send reminder	Actions complete

13. Web — Finance Portal

#	Scenario	Steps	Expected result
13.1	Pending queue	Open pending reports	Shows <code>pending_finance</code> for managed centers
13.2	Final approve	Sign and approve	Status → approved ; employee locked
13.3	Revision to employee	Request revision	Employee notified appropriately
13.4	PDF export	Export report PDF	Downloads; totals correct
13.5	Map PDF	Export with maps enabled	Map PDF generates
13.6	Managed centers	Filter by assigned centers	Only relevant reports shown

14. Web — Contracts Portal (read-only)

#	Scenario	Steps	Expected result
14.1	View reports	Browse all/pending/approved	Lists load
14.2	No approve	Inspect report actions	No Approve or Request Revision
14.3	Contract caps	View contract cap data	Displays without errors
14.4	Analytics	Open analytics	Read-only data loads

15. Web — Admin Portal

Employee and HR sync

#	Scenario	Steps	Expected result
15.1	Create employee	Add new employee	Can log in on mobile/web
15.2	Edit employee	Change cost centers, supervisor	Saves; reflects in portals
15.3	Archive employee	Archive inactive employee	Removed from active lists
15.4	HR sync — normal	Sync from HR API → apply	Creates/updates as expected
15.5	HR sync — email typo	Corrected local email (e.g. steven vs stevin)	No duplicate create; no archive
15.6	HR sync — name change	New HR email (e.g. feliciano vs sledge)	No duplicate create
15.7	HR sync — ignore	“Don’t ask again” on update/archive	Persists on next sync
15.8	Dedupe by email	Run dedupe if duplicates exist	Extra rows merged

Supervisor and configuration

#	Scenario	Steps	Expected result
15.9	Promote supervisor	Promote to supervisor	Supervisor portal access works
15.10	Promote senior staff	Promote to senior staff	Senior staff portal works
15.11	Orphaned staff	Staff on archived supervisor	Alert shows; release works
15.12	Per diem rules	Set single and tiered per diem	Mobile/web follow rules
15.13	Notifications	Toggle workflow events	Emails respect toggles
15.14	Audit log	Perform admin action	Appears in audit log

16. End-to-end approval workflows

Run these with **different accounts** (or testers playing each role).

16A — Full chain (with senior staff)

1. Staff completes and **submits** report
2. **Senior staff** approves (no sign) → pending_supervisor
3. **Supervisor** approves with signature → pending_finance
4. **Finance** approves with signature → approved
5. Staff confirms report is **locked**

16B — Full chain (no senior staff)

1. Staff submits → pending_supervisor
2. Supervisor → Finance → Approved

16C — Revision from supervisor

1. Staff submits
2. Supervisor requests revision on **one mileage + one receipt**
3. Staff fixes and **resubmits**
4. Approval chain restarts correctly

16D — Revision from finance

1. Report reaches finance
2. Finance requests revision to **employee**
3. Staff fixes and resubmits

16E — Weekly check-up (not monthly approval)

1. Staff shares **weekly check-up** on draft report
 2. Supervisor opens report → **Accept check-up only**
 3. Supervisor accepts → employee notified
 4. Monthly report still **draft** until formal submit
-

17. Cross-platform sync matrix

Data type	Enter mobile → verify web	Enter web → verify mobile
GPS mileage	✓	—
Manual mileage	✓	✓
Receipt	✓	✓
Daily hours	✓	—
Day off / PTO	✓	✓
Per diem	✓	✓
My Flock	✓	✓ (Settings)
Description	✓	✓

18. Notifications

#	Scenario	Expected result
18.1	Report submitted	First approver notified
18.2	Approval step	Next approver notified
18.3	Revision requested	Employee notified
18.4	Weekly check-up	Senior staff + supervisor notified
18.5	Click notification	Navigates to correct report/month
18.6	Mark read	Count decreases correctly

19. Regression checklist (recent fixes)

Check each before wider release:

- ☐ Per Diem does not randomly return to Home
 - ☐ PTO day off on mobile → 8 hrs on web (not Working Hours)
 - ☐ PTO in Timesheet bottom section stays in category rows
 - ☐ Day off dropdown (PTO/Sick/Holiday) sticks after Save on web
 - ☐ HR sync: corrected email not archived; typo email not created
 - ☐ HR sync: name-change email not created as duplicate
 - ☐ Supervisor assign staff shows state + cost center
 - ☐ Weekly check-up: supervisor sees Accept only, not Approve
 - ☐ Receipts page: no Generate Monthly PDF button
 - ☐ Notifications bell loads and clears correctly
 - ☐ Finance map PDF export works
-

20. Edge cases

#	Scenario	Expected result
20.1	Month boundary	Entries on last/first day appear in correct month
20.2	Multi cost center	Hours/mileage split correctly; export odometer continuous
20.3	Large report	Full month saves/submits/PDF without timeout
20.4	Archived supervisor	Routing skips archived; admin repair available
20.5	Session expiry	Friendly re-login on web
20.6	Portal switcher	Only allowed portals shown

Suggested test schedule

Read this first: You do not have to finish everything in one day. Work through one week at a time. Each “section” is a numbered part of this document (for example, section 5 is Receipts). Mark each test **Pass**, **Fail**, or **Blocked**. If something breaks, write down what you did and tell Goose.

Week	What to do (plain English)
Week 1	Use the phone app for everyday tasks. Work through sections 1–9 (login, home screen, GPS trips, manual mileage, receipts, daily hours, per diem, My Flock, and settings). Then check section 17 (the sync table) to make sure phone data shows up on the website.
Week 2	Use the Staff Portal on your computer. Do section 10 (build and save your expense report on the web). Also run section 19 (the regression checklist — quick checks that recent fixes still work).
Week 3	Test the approval chain. Do section 16 (full approval workflows with different people playing staff, supervisor, finance, etc.). Also test sections 11–13 (Senior Staff, Supervisor, and Finance portals).
Week 4	Admin and special cases. If you have admin access, do section 15 (employees and HR sync). Test section 14 (Contracts portal, read-only). Finish with section 20 (edge cases — weird situations like month boundaries).

Tip: If a step confuses you, skip it, note **Blocked**, and **Contact Goose**. Do not guess and do not spend an hour stuck on one line.

Approval status reference

Status	Meaning
draft	Not submitted; employee can edit
pending_senior_staff	Awaiting senior staff review
pending_supervisor	Awaiting supervisor approval
pending_finance	Awaiting finance approval
needs_revision	Returned to employee for fixes
approved	Final; locked for editing

Routing order: Senior Staff (if assigned) → Supervisor → Finance

*Oxford House, Inc. — internal beta testing document. Questions or problems: **Contact Goose.***
